base to track his activity. You can also pull the entire inventory and parts numbers from the backend data server

## Email Survey

Bulk email Survey where the users go to this site create a account that will Create them a profile page. From there they can enter their credit card information buy credits for the bulk emails, then create a survey use credits to send out emails with a auto reply after they complete the survey all the data will be collected and stored in the data base, then analyzed to be used to make the user business more smoother.

## EXPERIENCE

### ALL ACCOUNTING, LLC.

MAY 2015-OCTOBER

#### FRONT END DEVELOPER

Developed dynamic and interactive website. Conducted a needs assessment with each client. Designed processes for cleanup and performance improvement. Assisted end users with solving operating problems. Changing the code, software or graphics of existing websites. Created and maintained the front-end standards document and oversaw production of JavaScript, HTML and CSS. Produce reports and statistical information for senior managers. Worked in both Agile & Waterfall settings. Optimized pages for page speed using Google Page Speed (API) for Apache to obtain higher rankings on Search Engines. Provided guidance and advice to less experience staff. Fixed front end bugs (HTML5, CSS, JavaScript errors (JQUERY), testing, (A/B Split Testing), unit testing. My last year, I worked more on the front end using React.js. I mainly focus on developing user interface components and implementing them by following a well-known **React.js** workflows (such as Flux or Redux). I was responsible for making sure that these components and the overall application were robust and easy to maintain. On a few ecommerce project, I was responsible for added and remove products from the floating cart. Products persist in floating cart even after page reloads, product stopper for free shipping, sort products by highest to lowest and lowest to highest.

### CODE SOLUTION

FEBRUARY 2018- JUNE 2018

#### FRONT END DEVELOPER

Developed concepts, control project flow, and ensured deliverable milestones are met. Worked closely with senior developers and learned advanced project management skills. Performed website design and development for clients in a diverse field. Used markup language to create user friendly web pages. Optimize applications for maximum speed. Partner with back-end developers and web designer to improve usability. Assist back-end developers with coding and troubleshooting. Monitored website performance, watch for traffic drops related to site usability problems to rectify the issue. Designed a framework for creating user applications
